# Nischal Timalsina

Product Designer / Fullstack Developer

⌖ Kathmandu, Nepal    ☎ +977-985-5011772    ✉ contact@nischaltimalsina.com.np    ⊕ nischaltimalsina.com.np

Experienced Frontend Developer and UI/UX-oriented engineer with deep expertise in Next.js, React, TypeScript, and modern component-driven architectures. Skilled at transforming complex requirements into clean, usable interfaces with a strong focus on accessibility, performance, and responsive design. Blends technical leadership with creative design thinking to deliver polished, user-focused digital experiences. Adept at building scalable frontend systems, reusable components, and cross-functional design-development workflows.

## Work

### Product Designer  at Threatsview

Jun 2024 - Present

Remote (Qatar)

Leading frontend architecture and development using Next.js, focusing on performance, scalability, and clean UX.

Owning product and UI/UX design decisions, translating complex security workflows into intuitive, usable interfaces.

Designing and maintaining a reusable design system and component library while collaborating closely with stakeholders and backend engineers.

### Senior Frontend Developer  at E-Signature

Mar 2023 - May 2024

Kathmandu, Nepal

Designed and built interactive web and desktop interfaces across React, Next.js, and Electron.

Worked closely with stakeholders to turn product requirements and design concepts into reliable frontend implementations.

Established reusable component patterns and design systems to improve consistency and development speed.

### Product Designer  at Adsflow

Jan 2024 - Feb 2025

Remote

Led product design and frontend development, shaping user flows, UI patterns, and overall product experience.

Conducted user research and design iterations to improve usability and reduce friction.

Built and maintained a reusable Next.js design system to ensure consistency and long-term maintainability.

### Frontend Developer  at Iagon

May 2023 - Jan 2024

Kathmandu, Nepal

Implemented complex frontend features by translating UX designs into scalable React and Next.js components.

Integrated Web3 functionality and third-party services, including authentication and payment systems.

Contributed to shared component libraries and frontend architecture improvements.

### Frontend Developer  at Aspirant Technology

Developed and maintained React-based applications with a focus on reusable, maintainable components.

| | | |
